

Direct-to-Film Transfer Application Instructions

SETTINGS

- Heat Press Temperature: 160°-165° C (320°-330° F)
- Cotton and Cotton/Polyester Blends (Recommended)
- NOTE: Dye migration may occur on fabric with a high polyester content

TRANSFER

1. Preheat garment in heat press for 10 seconds to remove moisture.
2. Place transfer print on garment.
3. Use a non-stick cover sheet over the transfer (parchment, craft paper, etc.)
4. Heat press the transfer using firm pressure for 15-20 seconds.
5. Remove the garment from the heat press, then let cool before peeling.
6. Quickly peel the transfer sheet at corner after it is completely cold.
7. Return the garment on to the heat press.
8. Place a cover sheet over the image, then repress for 5 seconds.
9. Remove the cover sheet, and your graphic is complete.

WASHING

- Wash in cold water.
- Do not use bleach.
- Machine dry on low temperature or hang dry.
